

Model 170 SPRAY MODULE

Designed and Manufactured in Australia
www.gazeeka.com.au

Features

- ▶ Marks bales with an electronically timed "spot".
- ▶ Uses Dy-Mark "Farm Spray" – Government certified for fodder use.
- ▶ Electronically timed "off" time to avoid over spraying.
- ▶ Left and right hand versions available.
- ▶ 12V baler version and 24V industrial plant version available.

Proven Technology Successfully operated for many years with the Gazeeka microwave moisture meters mounted on the rear of large square balers.

12 V dc version Can be used on mobile machinery such as hay balers and includes a cable and push button module to operate the spray mechanism from the tractor.

24V dc version Designed to operate from a plant PLC in a plant such as a fodder processing plant.
