

Model 875 PRESERVATIVE FLOW CONTROLLER

Designed and Manufactured in Australia
www.gazeeka.com.au

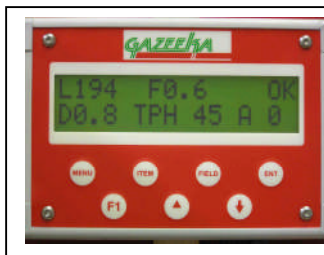

Features

- ▶ Save money by not over using preservative.
- ▶ Reduce the risk of under using preservative.
- ▶ Produces an Alarm on inaccurate flow (and blocked jet).
- ▶ Measures the actual flow rate not the pressure.
- ▶ Controls the flow rate using a feed back loop to the pump.
- ▶ LCD and keypad provides access to setup parameters.
- ▶ Ability to control the flow to suit the mass flow rate of the fodder.
- ▶ Additional ability to control the flow based on moisture content.
- ▶ Designed to use "Silo Guard" preservative.
- ▶ Part of the "Gazeeka" family of products for the Fodder industry.
